

I'm Maria and I'm 21 years-old. Two years ago, I learned I had HIV. I didn't think I'd live long enough to finish college. But thanks to my anti-retrovirals, I've stayed healthy and I've been able to continue my education. Now, graduating from college is a real possibility.

Help Maria get her college degree by supporting AIDS Action's proposal to strengthen and modernize the AIDS Drug Assistance Program (ADAP).

until it's over
