

**mom got treated
for hiv so I don't have to.**

America's AIDS Drug Assistance Program (ADAP) is in danger. It needs the help of the President, Congress, and all Americans.

You can help today by asking your congressional representative to support AIDS Action's legislative proposal to ensure that all people who need HIV medications get them.

For more information, go to www.aidsaction.org.

It's a matter of life.
